PROFESSIONAL EXPERIENCE

Kraken Sense

May 2026 – Present

Junior Software Developer — Contract, Full Time

- Designed, developed, and maintained 3 internal full-stack applications using React (JavaScript), FastAPI, and PostgreSQL to support internal operational workflows.
- Performed QA testing and debugging across frontend, backend, and database systems, identifying and resolving issues prior to release.
- Collaborated with engineers and stakeholders to gather feedback, prioritize requirements, and iterate on application quality and performance.
- Leveraged AI tools such as Claude throughout the development lifecycle to accelerate testing, debugging, and iteration.
- Built and enhanced backend APIs with FastAPI, implementing business logic, database interactions, and integrations across application services.
- Managed PostgreSQL databases and supported deployments on Google Cloud Platform using Cloud Run and Cloud SQL.

Agro-Costa SAS

May 2024 – December 2024

Junior Software Developer Intern

- Took ownership of features across web, backend, automation, and database systems, delivering solutions from design through deployment in a production environment.
- Identified, investigated, and resolved production issues across frontend, backend, and data systems, tracing bugs to their root cause across the stack.
- Implemented role-based access control (RBAC) to manage multiple user types, improving administrative workflows and increasing platform engagement by 30%.
- Developed and maintained backend services using PHP, implementing business logic, API integrations, and database-driven workflows.
- Designed and optimized SQL Server and MySQL queries to support reliable, relational data access.

PROJECTS

Simple Rentals – Full Stack Web App

January 2025 – August 2025

- Designed and developed a full-stack rental platform with a responsive React frontend, backend REST APIs, authentication, and database architecture.
- Wrote and executed unit and end-to-end test scripts with Cypress across the product development lifecycle, identifying and documenting bugs prior to release.
- Built REST APIs using Django REST Framework and PostgreSQL, and set up CI/CD with Docker and GitHub Actions.

TECHNICAL SKILLS

Web & Frontend: Vue.js, React, HTML5, CSS3, JavaScript

Backend: Python (FastAPI, Django), PHP, ASP.NET

Testing & QA: Cypress (unit & end-to-end testing), manual QA testing, bug identification & tracking, test plan execution

Databases: MySQL, Microsoft SQL Server, PostgreSQL, MongoDB, SQLite

Cloud & Infrastructure: Google Cloud Platform (Cloud Run, Cloud SQL), Docker, GitHub Actions, Azure, Git

AI Tools: Claude, Copilot

EDUCATION

Bachelor of Computer Science – Honours (Co-op), With Distinction

2021 – 2025

Conestoga College, Waterloo

- Relevant Coursework: Software Design Techniques · Data Structures and Algorithms · Software Development Life Cycle · Software Quality · Object Oriented Programming · Database Systems
