PROFESSIONAL EXPERIENCE

Junior Software Developer — Kraken Sense *May 2026 – July 2026*
Contract, Full Time | Oakville, ON, Canada

- Owned an internal employee and task management platform (FastAPI, React) as the main full-stack developer, including its deployment to Google Cloud Platform (Cloud Run, Cloud SQL).
- Fixed critical Scheduler bugs and shipped coworker-requested enhancements, growing daily active usage from roughly 20% to about 70% of the company and reducing Scheduler error reports to zero.
- Enhanced the company-wide bug/feature-request system with structured ticket metadata, roughly doubling weekly tickets logged and resolution rate.
- Worked in an Agile cycle with end users and contributed to CI/CD; used Claude and GitHub Copilot daily for development, debugging, and testing, including MCP integrations.

Junior Software Developer Intern — Agro-Costa SAS *May 2024 – December 2024*
Internship | Barranquilla, Colombia

- Owned order picking in a Warehouse Management System (JavaScript, ASP.NET, Entity Framework), moving it to a transactional model with barcode scanning, cutting picking time by roughly 60–70%.
- Built a role-based access control (RBAC) module for a customer-facing inventory search app (PHP, JavaScript), replacing manual database edits, lifting logged engagement ~30%.
- Built a C# WinForms app replacing a manual Excel-based process for syncing inventory data between internal and public databases, with row-level customization, cutting manual effort by about 90%.
- Developed ASP.NET, PHP, and Node.js services; practiced TDD; wrote SQL Server and MySQL queries.

PROJECTS

Marquee — Distributed Social Movie-Discovery App *July 2026 – Present*

- ASP.NET Core (.NET 9) API and worker, Angular 20 SPA, PostgreSQL, Redis, RabbitMQ (MassTransit) with an outbox pattern, and SignalR; Cognito-backed authentication; OpenTelemetry tracing and Serilog logging.
- Deployed to AWS as a personal project (CDK in C#, EC2, CloudFront, S3) with GitHub Actions CI/CD; Testcontainers and k6 tests, including 1,000 concurrent WebSocket connections.

Grasp — RAG-Based Study Companion *September 2026 – Present*

- FastAPI, PostgreSQL/pgvector, and React/TypeScript app that answers questions about video transcripts using RAG with timestamp citations (OpenAI APIs, token logging); Pytest, Docker Compose.

Applyt — Self-Hosted Job Application Tracker *June 2026 – August 2026*

- Local-first tracker (Node.js, Fastify, React, TypeScript) with a Chrome extension and Anthropic, OpenAI, and Ollama API integrations with per-run cost tracking; Vitest.

HandLock — Windows Biometric File Security App *July 2026 – August 2026*

- Python desktop app that encrypts files and gates access with face recognition (OpenCV), a hand-gesture match, and blink liveness detection (MediaPipe).

Simple Rentals — Full Stack Web App *January 2025 – August 2025*

- On a small team, owned the Django REST/PostgreSQL backend, a scikit-learn recommender, and testing and CI/CD (TDD, Cypress, GitHub Actions).

EDUCATION

Bachelor of Computer Science – Honours (Co-op), With Distinction *2021 – 2025*
Major in Cybersecurity | Conestoga College, Waterloo

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C#, Java, SQL, PHP, C, C++, HTML5, CSS3
Web & Backend: React, Angular, ASP.NET Core, Node.js, FastAPI, Django, Entity Framework, REST APIs, WinForms
Databases: PostgreSQL (pgvector), Microsoft SQL Server, MySQL, MongoDB, SQLite, Redis
Cloud & DevOps: AWS (CDK, EC2, CloudFront, S3, Cognito; personal project), GCP (Cloud Run, Cloud SQL), Docker, GitHub Actions, Azure DevOps, Git, RabbitMQ, OpenTelemetry
Testing & AI Tools: TDD, Pytest, Vitest, Cypress, xUnit, Testcontainers, k6; Claude, GitHub Copilot, MCP, LLM APIs, RAG

CERTIFICATIONS

AWS Certified AI Practitioner | AWS Certified Cloud Practitioner *September 2026*
